# Bus Stop E-Ink Pilot

## Real-time arrivals & alerts on solar-powered E Ink signs

- Real-time information is one of the most-requested bus stop amenities—and the one that riders say would make them most likely to ride the bus more often.
- But this is difficult to do at our 7,000+ unpowered bus stops in 50+ municipalities.
- We're particularly excited about this pilot project, launching today on 18 signs in 6 cities and towns
- Send us feedback at [mbta.com/einkfeedback](https://mbta.com/einkfeedback)
