- Lookahead |** We're continuing to prepare for upcoming construction on the [Safety and Reliability Improvements across the Green Line](#) planned for this summer and fall. The work will include replacing over 2.5 miles of track across the Green Line, as well as 10 vehicle and pedestrian crossings, and 6 units of special trackwork. At the same time, crews will install Green Line Train Protection System equipment along the tracks. As a result of these upgrades to the system, Green Line riders will be able to enjoy safer, more comfortable, and more reliable service with reduced risk of unplanned service disruptions. Additionally, this work will enable a beautification and tree-planting effort along the E Branch. Please join the GLT team for a [virtual public meeting on Wednesday, May 18](#) to learn more - [click here to register](#) for the meeting
