

Newton Commuter Rail Stations Accessibility Improvements

Upcoming Drilling Activities, Auburndale Station October 3 - November 4 No work on October 30 and 31

The MBTA is planning accessibility upgrades at three Commuter Rail stations on the [Framingham/Worcester Line](#) in Newton. Currently, the existing low-level single side platforms can only be accessed by individual stairways at [Auburndale](#), [West Newton](#), and [Newtonville](#) Stations.

The MBTA will conduct the following geotechnical drilling activities at and around Auburndale Station:

October 3 - November 4

(No work will be conducted on October 30 and 31)

Crews are anticipated to begin geotechnical drilling activities at and around Auburndale Station the week of October 3. This work is necessary for data collection to support design advancement for the proposed station improvements.

The schedule for this work is weather dependent and subject to change without notice.

What should pedestrians, bicyclists, and drivers expect?

During portions of the work, temporary single lane and sidewalk closures will be required and some parking spaces will be temporarily unavailable on the south side of Auburn Street in the station vicinity, from east of Woodbine Street to east of Melrose Street. These restrictions are required for drilling equipment access and to safely conduct drilling activities.

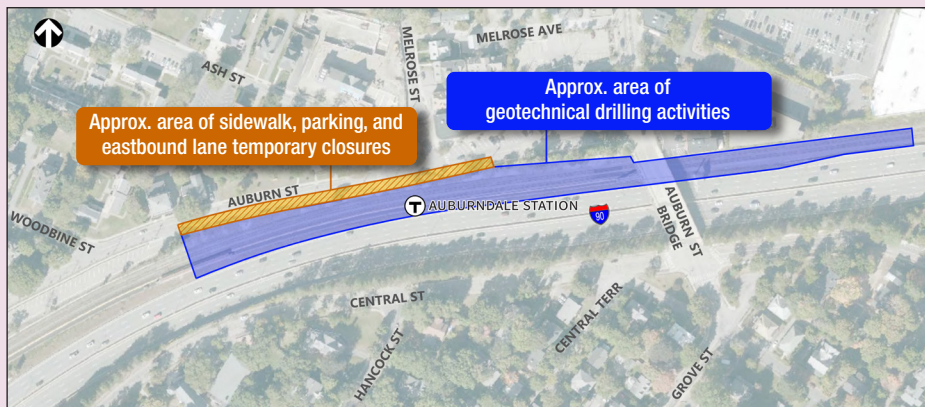

What should neighbors expect?

The majority of work will start at approximately 12:00 AM and continue through 5:00 AM. There will be some noise and temporary lighting during this work. The project team is committed to minimizing disruptions to the community.
