

MBTA Green Line D Branch Station Accessibility Improvements

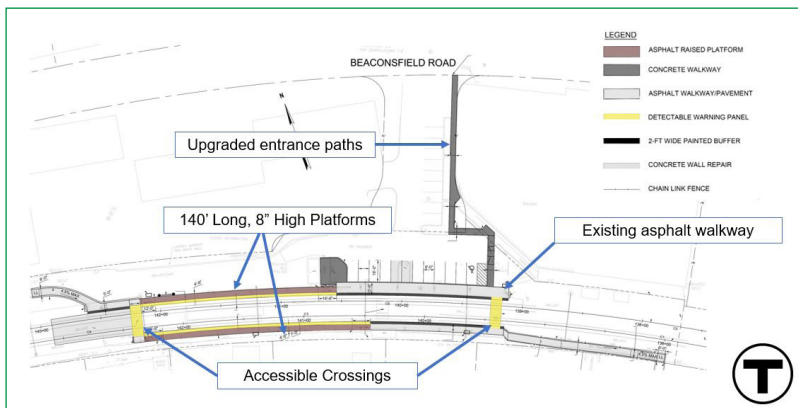

Fall Construction Updates

The Green Line Transformation Team will be performing near-term upgrades to platforms and access walkways in Fall 2024 to provide accessible boarding at Beaconsfield, Chestnut Hill, Eliot, and Waban stations. Work will be done over 3 weekend diversions in Fall 2024 (Oct 5-6, Oct 19-20, and Nov 9-10) along with day and night work while service is running on the D Branch. Long term improvements are planned for 2027 in conjunction with the introduction of our new Type 10 vehicles.

Why We're Doing This Work

Beaconsfield, Chestnut Hill, Eliot, and Waban stations currently have several barriers for accessibility. Upgrades will include:

- Raised platforms for accessible boarding
- Accessible track crossings
- Elimination of additional significant barriers for riders with disabilities
