

# T Water Transportation Study

**The MBTA is reimagining the future of water transportation. The Water Transportation Study is the first step in this effort.**

Ferry service is an important resource that supports growing neighborhoods. This study will plan the next iteration of a fully accessible water transportation network. We need input on recommended locations for new ferry routes, terminals, facilities, and improvements to existing ferry service.

We want to hear from you, the riders and residents of the region, because you know your neighborhoods and the trips you make. Join us at one of our in-person open houses, attend a virtual public meeting, or take our online survey!
