

Focus 2050

MBTA'S PROGRAM FOR MASS TRANSPORTATION

Planning the Future of the MBTA and the Commonwealth

Decisions we make today will shape how people move around Massachusetts for decades. Focus 2050 sets the long-term direction for a safer, more reliable, more accessible MBTA through the year 2050.

What is Focus 2050?

Focus 2050 is the MBTA's long-range plan for transit investments over the next 25 years.

- Connecting the MBTA's strategic plan with its near-term capital investment program.
- Identifying investment priorities and potential capital improvements through 2050.
- Looking beyond today's needs to prepare the system for future growth, climate impacts, and changing travel patterns.

The plan will guide MBTA, MassDOT, and policymakers as they make decisions that affect riders, communities, and the regional economy.

Your engagement matters.

Public input is ongoing, and we have two stages of concentrated outreach.

How can you get involved?

Your voice matters in shaping the future of transit. Participate by:

- Attending virtual or in-person meetings
- Visiting outreach tables at MBTA stations
- Submitting comments by email

We encourage advocacy organizations, municipalities, and community groups to partner with us throughout the process.
