# November OTP

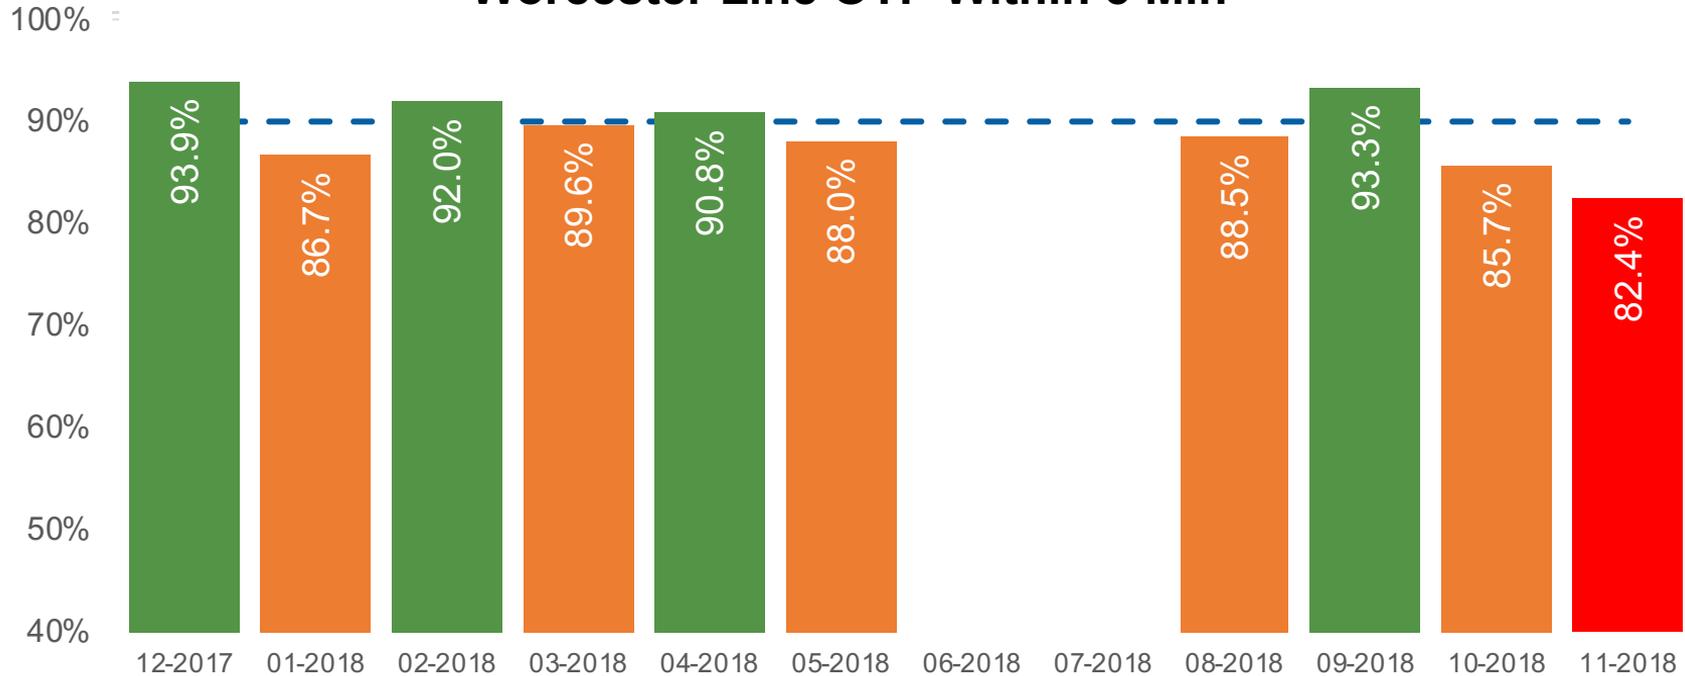

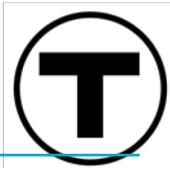

- ◉ November OTP was largely driven by the impact of leaf fall in wet conditions; the cause of over 18% of all primary delays, during the heaviest Oct-Nov rainfall in 10 years
- ◉ Significant rail contamination (black rail) across the network on November 4<sup>th</sup> and 5<sup>th</sup>, due to unusually heavy leaf fall, led to safety restrictions; these two days alone made up 16% of all delays
- ◉ Despite these results, the new rail-wash equipment worked well, helping to mitigate the effects of slippery rail

## Worcester Line Performance

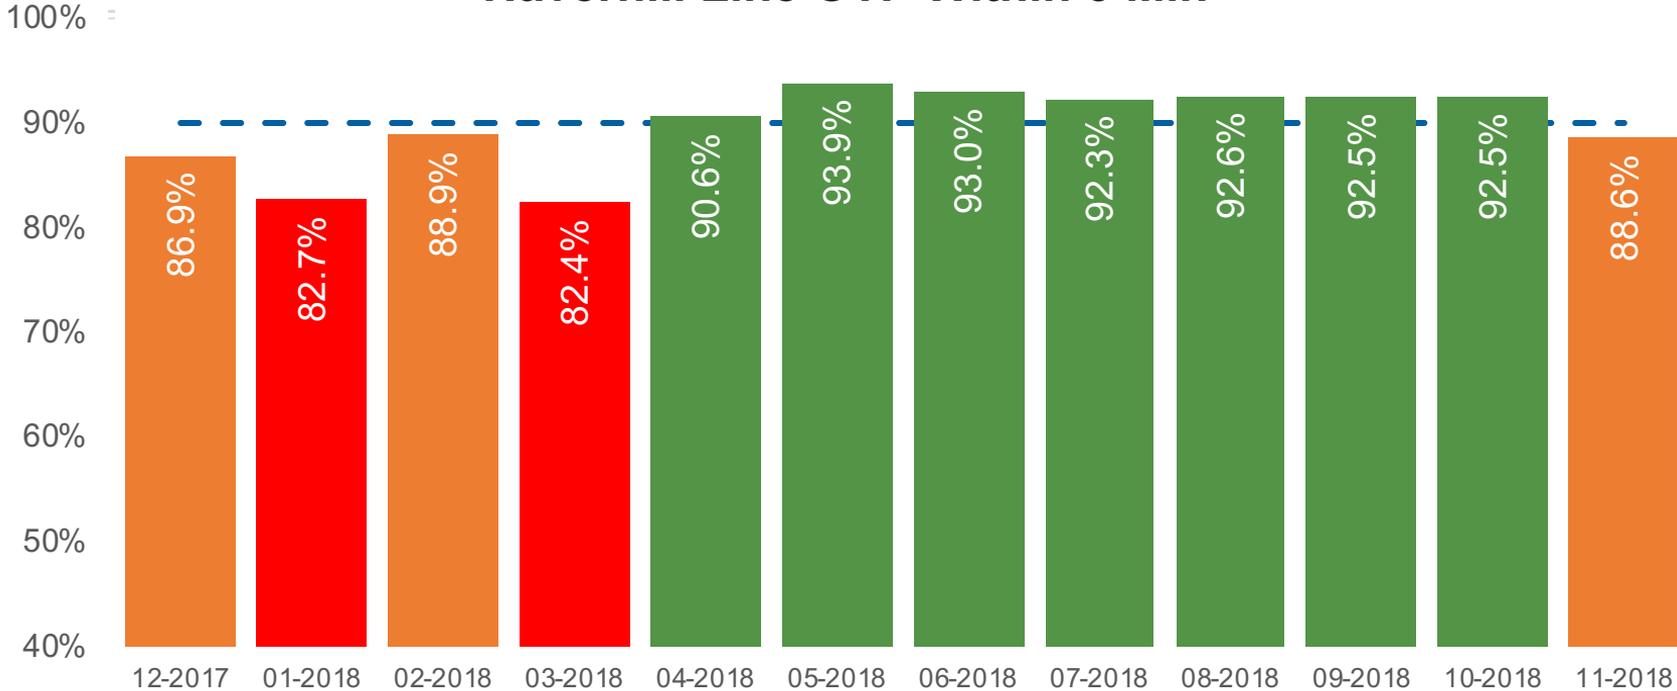

---

- ⦿ Since June, the Worcester Line has been affected by planned works, including Positive Train Control (PTC) and required state of good repair maintenance.
- ⦿ As with the rest of the network, railhead conditions were a significant factor during the month, as were mechanical related problems.
- ⦿ December performance is 88% through December 13<sup>th</sup>, including a 100% weekday on December 11<sup>th</sup>.
- ⦿ Overall 2018 performance is 87.2%, versus 79.6% in 2015 – 2017.
